TIMENEX-DD-SHF-01 Shifts

Naufar defines and stores shift master data in the SAP. Timenex pulls the same master data into local database and then shift definitions including start time, end time etc. are provided in the Timenex database.

A user can perform following actions on this page;

1. TIMENEX-DD-SHF-02, TIMENEX-DD-SHF-04: Create a new shift definition which includes providing time and resource management details.

+ 📄 🗑️
 Q

2. TIMENEX-DD-SHF-03: Update an existing shift definition

SH-A	Shift A	SHAOPD	OPD Doctor Appointment	06:00:00	14:00:00	Active
------	---------	--------	------------------------	----------	----------	--------

The user double clicks (or can select the record and click edit icon in the action menu described above) of the record to be updated and it opens as shown below;

Save

Close

3. The fetched information includes employee name and their current department.

4. User can select new department under 'Move To Unit' label.
5. User provides start and end date. End date is optional and is required when the employee is being transferred for a specific duration of time.

Emp No	Emp Name	Start Date	End Date	Moved Unit ID	Previous Unit ID
26045201	randaoomdp	2020-01-15	2020-02-28	Residential	OPD Doctor Appointment

Above is the listing of all such actions performed on the transfer window. This listing is available to all departments

Schedule:

TIMENEX-DD-ROS-01: Create Roster

Step 1:

Click on the add icon as shown below

TIMENEX-DD-ROS-02: Step 2:

Provide necessary information to start roster definition;

1. Select the unit for which you wish to create the roster
2. Select the number of days for which you want the system to generate your initial roster. The available options are cycles for 28, 30 and 39 days respectively. It must be noted that these are specific durations for which the rosters are created and the system is thoroughly tested for the same.
3. Start date marks the first day of the roster to be applicable
4. End date is selected automatically and marks the end of first cycle of the roster.

Step 2

User starts scheduling at this step. Click on any slot as shown in the picture below and select Bulk Assignment option to start scheduling.

Step 2:

Clicking Bulk Assignment opens the screen below. User can select the desired shift for that resource and plan his schedule for the desired number of days. This enables the user to either keep an employee in the same shift for whole duration of roster or provide a different weekly schedule or whichever way they wish to execute. Saving this information would generate the schedule for selected employee, with in the selected shift for the provided date span.
